

Resolution Adopting a Mosquito Remediation Plan
for the Village of Mamaroneck

WHEREAS, it is the intention of the Village of Mamaroneck to adopt a coordinated mosquito preventative plan (“Mosquito Remediation Plan”) for the entire Village. The Westchester Land Trust, Town of Rye and owners of Magid Pond are working cooperatively with the Village to develop a comprehensive program to remediate mosquito activity, particularly in the Shore Acres/Taylors Lane area. The Village work includes catch basins Village-wide, Guion Creek, and Village-owned properties in the Shore Acres/Taylors Lane area. The intent is to negotiate a workplan among the parties, whereby all parties fund the work on their respective properties. The Village will administer the program and procure the contractor, who will invoice the individual property owners separately. Each party will determine the extent of remediation on their respective properties and shall be responsible for obtaining any necessary permits.

The details of the Village program are as follows:

- Larvicide treatment in catch basins throughout the Village, including the 127 catch basins in Shore Acres/Taylors Lane area. This treatment shall be done at the beginning of the season as recommended by the contractor but no later than May 1 of every year.
- Larvicide treatment in Guion Creek. This treatment shall be done at the beginning of the season as recommended by the contractor but no later than May 1 of every year.
- Larvicide treatment in other breeding areas in the Village following inspection and recommendation by the Village contractor.
- Spraying the catch basins Village-wide, the median along the Parkway, Guion Creek, and streets along Taylors Lane and Guion Creek Village- owned properties, as needed.
- In order to start the work described herein by no later than May 1, the Village intends to apply for any necessary permits by February 1.

It is the Village’s understanding that the Westchester Land Trust will continue to apply the BTI treatment next year, beginning earlier in the season. All parties have agreed to coordinate these efforts with the Westchester County Department of Health.

NOW, THEREFORE, BE IT RESOLVED, by the Board of Trustees of the Village of Mamaroneck, that the Village of Mamaroneck adopts the aforementioned Mosquito Remediation Plan, and authorizes the Village Manager to execute said Plan; and be it further

RESOLVED, The Board of Trustees, as Lead Agency, finds and determines that the adoption of this Resolution is a Type II action under Section 617.5(c)(33) of the New York State Environmental Quality Review Act (SEQRA).
